

## PERSONAL SAWMILL LINE-UP

### MODEL LM 1

The Model LM 1 sawmill is a rugged, reliable, dependable and economical personal sawmill. This sawmill, with its large log capacity, is the favorite of the serious woodcrafter, farmer, rancher or the people who want to make their dreams come true by building their own home. This sawmill has a 30" saw throat and 12' standard cut length (extra track section are in 6' lengths). This is all that a do-it-yourselfer will ever need.

#### STANDARD FEATURES INCLUDE:

- A powerful 13 HP manual start gas engine
- Clean side cut sawmill
- 30" diameter log capability
- 2 - 5' track sections and 1 - 6' track section (16' total length)
- Hand crank height adjustment
- 18" diameter band wheels
- Log-Master roller bearing guide rollers
- 1-1/4" x 14'7" bandsaw blade
- Built in lube system on the mill
- Adjustable guide arm in and out
- Positive bandblade tensioning system
- Easy to read measuring adjustment for consistent board thickness
- Centrifugal clutch use to drive the bandblade so the blade stops when you are at idle
- 2" flange bearing drive shaft and idler shaft that support the bandwheels
- 3 quick set adjustable log dogs and 3 back dogs that work together so you don't have to work each side of the mill when you are clamping your logs
- You can cut down to 1" bottom board

### MODEL LM 15

The LOG-MASTER Model LM 15 has what you want in a small personal mill. Not only does this mill have a 29" saw throat with a 16' log length, but it has electric drive through the log and up and down for your cut set. The 25 HP Kohler® engine and Baldor electric motors deliver the power and performance that you need at the price you want. This is the mill to have for the first time sawyer or the weekend homebuilder.
