

# EDGERS

Log-Master builds the heaviest edger on the market today. They are over 20' long and weigh approximately 3,500 lbs. Our edger features carbide tipped split blades so you don't have to disassemble the edger to change the blades. NO re-alignment needed. We offer you two different power choices. This power and performance is at a level that has never been offered to consumers in the edger market before.

## STANDARD FEATURES ON BOTH EDGERS:

- Hydraulic feed of the board through the carbide tipped split blades
- Four industrial in-feed and four out feed rollers
- 7' in-feed and 7' out-feed roller bed made out of massive structural frame made of 3" x 6" x 1/4" steel
- Massive 2" blade mandrill
- Highway approved trailer with 15" tires and 3,500 lbs. axle
- Easy to read scale at the front of the edger for the hydraulically adjustable blade
- 6 quick level jacks that have 5,000 lbs capacity per jack

## TWO MODELS TO CHOOSE FROM:

### Model LM E25G

- 25 HP Kohler® engine
- 13" carbide tipped split blades

### Model LM E26D

- 26 HP CAT® diesel engine
- 15" carbide tipped blades
